

# New PZ Mobile Features

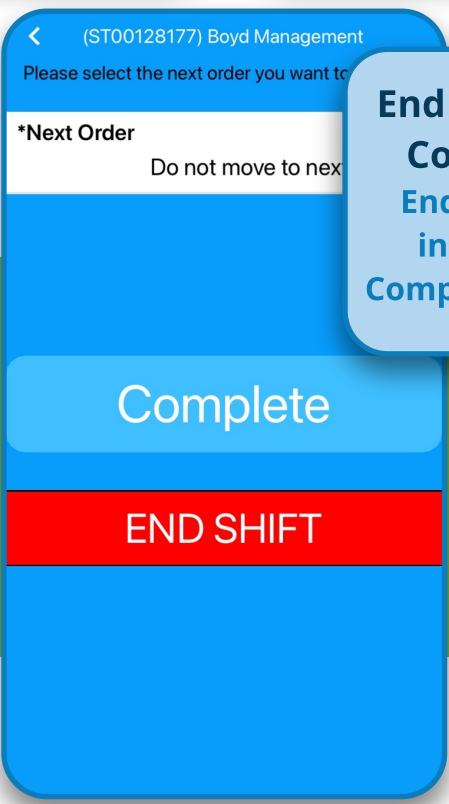

**Swipe Pass/Fail**  
Pass or fail inspection devices with one swipe from the device list or barcode screen

**Mass Pass Devices**  
Pass entire device types with one click

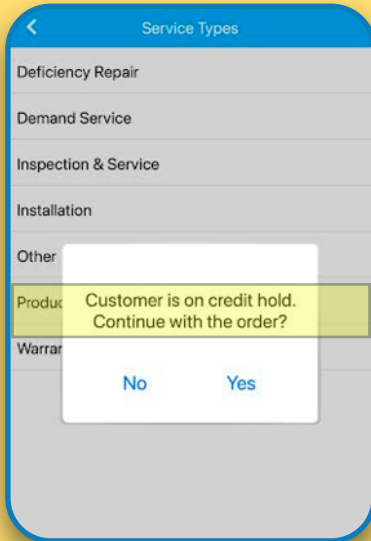

**Refresh Tech Options**  
Refresh mobile Settings without needing an Admin Sync

**End Shift Upon Completion**  
End Shift right in the ticket Completion screen

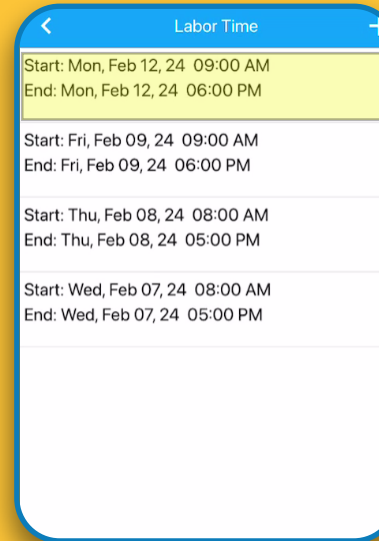

# New PZ Mobile Features

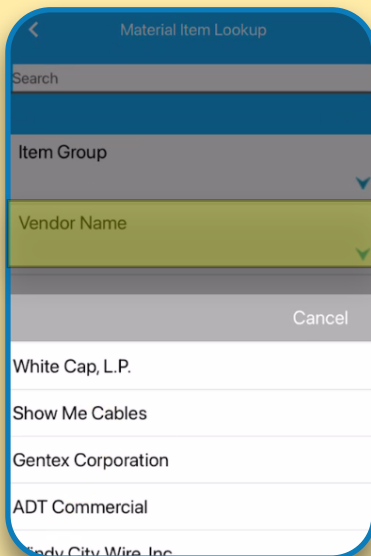

## New Order

- Tech Option: If the tech creates a new order on mobile and the customer is on credit hold, the tech can continue to create the order or cancel.

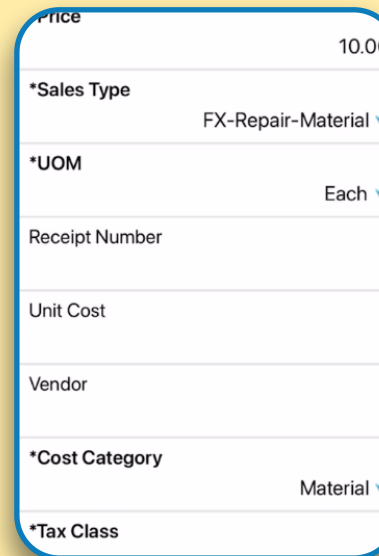

## Time Entry

- Tech Option: Sort time entries on tickets from newest to oldest entry.

## Material Lines

- Tech Option: Select by the Vendor Name instead of the Vendor Code when adding materials.

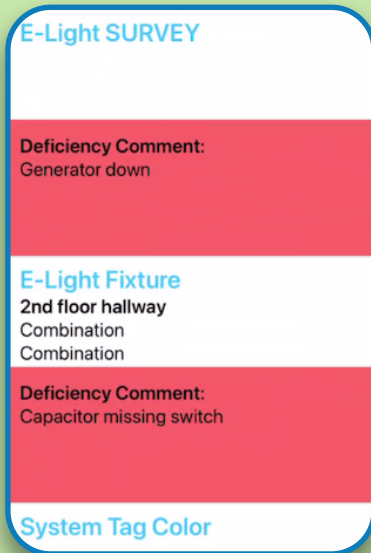

## Memo Lines

- Tech Option: Choose to hide the Taxable field when creating a memo line so that techs do not have to determine if an item is taxable.

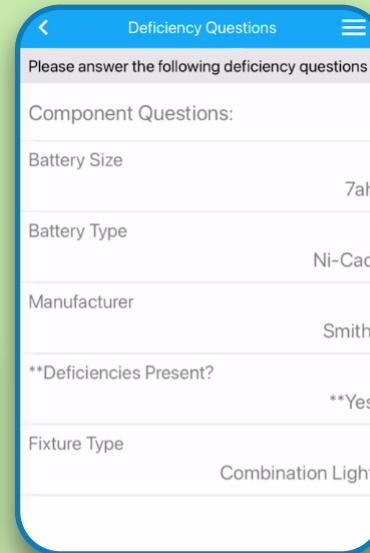

# New PZ Mobile Features

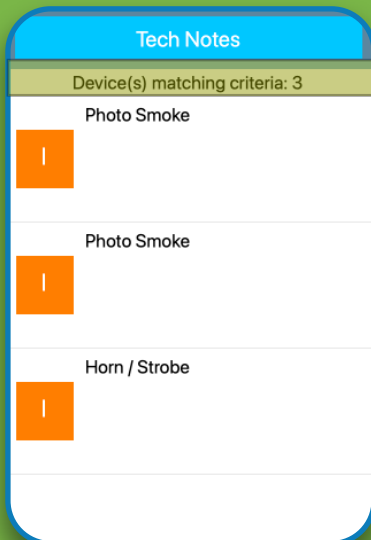

## Inspection Form Review

- Tech Option: Read over all of the deficiency comments before completing the ticket.

**Do you V2?**  
V2 mobile inspection forms take your reporting to the next level. Your techs and your customers will thank you! Contact us for a demo.

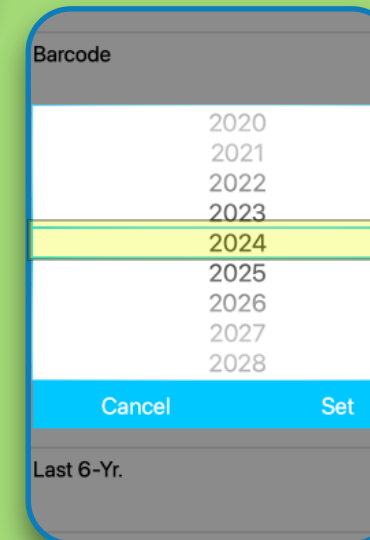

- Tech Option: Review all of the deficient device questions and answers from the Completion screen.

## Device Counts

- Tech Option: List the total device count after filter selections are made.

## Form Fields

- Tech Option: Set up inspection form date fields with the year only.

# PZ 2022 Mobile Product Improvements

We are constantly working to strengthen the PZ Mobile app to ensure your users have a reliable and error-free experience. In every release, we include a list of improvements and fixes:

<b>Mobile Photos Update with Inspection Following Merge</b>	Photos maintain relationship with their related forms after merge.
<b>Mobile Warehouse Filter</b>	If the 'EnableEmployeeDefaultWarehouse' tech option is configured as true, the option will work even if the Tech does not have a default warehouse assigned.
<b>Trim to User ID entry on Mobile</b>	Trimmed the User ID field so any leading or trailing spaces will be removed automatically.
<b>Mobile Order Dates Match on Planner and Order Info Tab</b>	Dispatch times displayed in the Order Info screen are the start and end times of the dispatch record selected in the Planner.
<b>Save Receipt Number, Unit Cost, UOM and Tax Classes on Mobile</b>	Fields will save when exiting the order line screen and save on server.
<b>Upload Large Number of Photos from Mobile</b>	Large amounts of photos are uploaded in batches of 30 photos.
<b>Reschedule date AM/PM selection</b>	When rescheduling an order, selecting 12pm or 12am is simplified.
<b>Zeros after Decimals</b>	For inspection form fields that allow decimals, the zeros after a decimal are retained.
<b>Exiting Time Screen after Edits</b>	Fixed error with exiting Labor Time screen after editing.
<b>Equipment Limit</b>	Add unlimited amount of equipment with unique locations within the Equipment tab
<b>Inspection Forms Filter</b>	When the inspections forms filter is set up to be based on service class, you can now assign as many service classes as you want per form.
<b>Tech Options Setup</b>	New Tech Options Setup screen makes it easier for users to add and manage tech options. Also, you can set up tech options for specific dispatch boards.
